

How do I add items to my cart?

There are two ways of adding items to your cart, the Search Field and Shop By Cabinet Style.

- a. **Search Field** The fastest way is to simply use the site search field (in the top banner of the webpage) to pull up the item you need. However, to use this effectively you need to be familiar with our item codes.
Simply enter the item code that you would like to add to the cart in the search field and hit enter. Your results will be returned. At that time, you can hit the Add To Cart button and the item will be added to your cart (you will see the quantity of items in your cart increase) and you may continue shopping.
*Please note that if we are out of stock on an item and you add it to your cart – instead of immediately adding it to the cart the product page will display. This will be your reminder that this is out of stock and will be backordered. You may still add it to your cart with the understanding that it will be backordered and shipped at a later time (use the Inventory Update in the toolbox to determine when we expect it to be available) or you may choose to substitute and add different items to the cart instead.

- b. **Shop by Cabinet Style** Another way to add items to your cart is to navigate thru the “Shop by Cabinet Style” menu on the left hand side of the screen. Begin by clicking on the style you would like to add to your cart. This will display the main page for this category. On this page will be a picture of the style kitchen you are buying along with the list of features for that style. Below that will begin a list of ALL the pieces in that style listed alphabetically by item number (please note that you may have to hit the “next page” button to view all the items).
You can choose to further limit the list of items displayed by choosing a category within your chosen style from the menu on the left. This category menu will appear after you have clicked on the style you are shopping in.
After clicking on your category, a sub category menu will appear at the top of the page. You can choose to either browse thru the products listed below (which are all the products within the category) or further filter your results by also choosing one of the sub-categories (please note that you may have to hit the “next page” button to view all the items).
Once you find the item you need you can hit the Add To Cart button. The item will be added to your cart (you will see the quantity of items in your cart increase) and you may continue shopping.
*Please note that if we are out of stock on an item and you add it to your cart – instead of immediately adding it to the cart the product page will display. This will be your reminder that this is out of stock and will be backordered. You may still add it to your cart with the understanding that it will be backordered and shipped at a later time (use the Inventory Update in the toolbox to determine when we expect it to be available) or you may choose to substitute and add different items to the cart instead.

Please note that if you need more than one of the same item you can either hit the Add To Cart button until the correct number of items have been added or you can update the quantities during the checkout process.
